

KVANT Spectrum 30

The high power full colour laser light system SPECTRUM has been designed for large outdoor events for thousands of people. This robust machine is built for touring and it takes advantage of excellent beam properties based on the OPSL Coherent Taipan and KVANT's blue Combo laser modules.
An optional integration of the Professional Audience Scanning System (PASS) also offers an outstanding level of laser display safety.

Basic specification:

Type: full colour, air cooled, white-light laser system
Guaranteed optical output: 29W

Suitable for: outdoor events

System control: Ethernet (cat5), DMX, ILDA, SD card (auto)
